RELATÓRIO ANUAL
ANNUAL REPORT

MENSAGEM DO PRESIDENTE

MESSAGE FROM THE CEO

Prezado leitor,

É com satisfação que apresentamos o Relatório ABPA, a mais importante publicação anual de estatística da entidade nacional da avicultura e da suinocultura do Brasil.

Em sua primeira edição após a criação da Associação Brasileira de Proteína Animal – entidade que nasceu da unificação das antigas UBABEF, de aves, e ABIPECS, de suínos, há um ano atrás - o Relatório ABPA traz, em formato renovado, o detalhamento da produção e da exportação de aves, ovos, suínos e material genético.

Em suas páginas, números contarão histórias de cadeias produtivas que seguiram caminhos inversos durante o ano de 2014. Por um lado, a suinocultura, que reduziu os níveis dos embarques, mas obteve fortes ganhos em receita. Por outro, as exportações de frangos, que alcançaram recordes histórico em volumes, embora com receita menor em relação ao resultado de 2013.

Em suínos, a Diarreia Suína Epidêmica (PED)

Dear Reader,

It is a great honor to present the ABPA Annual Report, the most important statistical publication of the national entity of the poultry and pork sectors in Brazil.

In its first edition after the creation of the Brazilian Association of Animal Protein – the organization originated from the merger of UBABEF, for poultry, and ABIPECS, for pork, a year ago – the ABPA Annual Report brings a renewed format with details of the production and exports of poultry, eggs, pork and genetics.

In its pages, the numbers tell stories of the production chains that followed different paths in 2014. On the one hand, the pork industry reduced its shipments in volume, but reached strong and high increases in revenue. On the other hand, the chicken exports reached a record high in volumes, although with lower revenue compared to 2013.

For the pork industry, the Porcine Epidemic

e o cenário político do leste europeu foram questões determinantes para o desempenho do ano. Já no setor de aves, a força dos embarques para a China – que autorizou em abril cinco novas plantas, além das 24 já habilitadas – somou-se aos bons níveis de embarques registrados para a Venezuela, Emirados Árabes Unidos, Arábia Saudita, Japão e outros grandes importadores.

Fator comum nos dois setores, a expansão da lista de empresas autorizadas a exportar para a Rússia favoreceu o saldo das duas cadeias produtivas no segundo semestre.

Seja na avicultura ou na suinocultura, a qualidade e a sanidade do produto brasileiro continuou fazendo a diferença. Em meio aos vários registros de PED e Influenza Aviária nos grandes produtores mundiais, o país seguiu livre de focos destas enfermidades – um significativo injeável, em um mercado altamente competitivo, como o da proteína animal.

Não à toa, todos os mercados já conquistados permaneceram abertos aos produtos avícolas e suinícolas do Brasil, e novas portas se abriram – a exemplo do Paquistão, para aves.

Este é um pequeno recorte do cenário que estão nas páginas a seguir, no Relatório ABPA – um guia fundamental para quem trabalha e investe na produção de alimentos do Brasil. Boa leitura!

FRANCISCO TURRA
PRESIDENTE-EXECUTIVO/CEO

Diarrhea (PED) and the political scene in Eastern Europe were determinant for the performance of the year. In the chicken sector, the shipments to China – which approved five new slaughterhouses for export besides the 24 already approved – added up to the good levels of exports to Venezuela, Arab Emirates, Saudi Arabia, Japan and other large importers.

A common factor between the two sectors, the new slaughterhouses approved for export to the Eurasian Customs Union favored the positive balance of our production chains in the second semester.

Whether in the poultry or pork sectors, the quality and safety of the Brazilian product make the difference. Among so many cases of PED and Avian Influenza in large world producers, Brazil remains free of such diseases – a significant feature, in a highly competitive market, like the animal protein one.

It is not a coincidence that open markets kept buying poultry and pork products from Brazil, and new doors opened, as Pakistan for chicken meat.

This is a small picture of what is on the pages to follow in ABPA's Annual Report – an essential guide for those who work and invest in food production in Brazil. Enjoy your reading!
